Xpeon-Zen Crack

Xpeon-Zen is a lightweight desktop enhancement utility whose purpose is to help you place a sidebar on your screen that lets you access various utilities, such as note keeper, batter watcher, calculator and search tool. User interface The sidebar resembles the Charms bar adopted by Windows 8. A smart button integrated in the GUI allows you to hide it from your view. When you hover your mouse cursor over the left side of the desktop, the sidebar

automatically reappears. Monitor battery, agenda, memory, and file system Xpeon-Zen gives you the possibility to set up various widgets that allow you to keep an eye on different system options. You can monitor your battery, get notifications when it exceeds a certain level, and pick the widget style (metro or widget). In addition, you can configure daily, weekly, monthly or yearly reminders, watch memory usage and automatically kill processes which exceed a custom value, as well as look for file system changes. Create notes and activate several tools You can create notes by providing information about the name and typing the desired messages. Plus, you can lock them. Xpeon-Zen lets you copy multiple text items to the clipboard, assign system hotkeys for faster actions, work with a simple calculator, as well as add desktop tags and shortcuts. A few general settings

enable you to change the color of the sidebar's background, alter the font color, pick the preferred position on the screen (left side or right side), and run the application at Windows startup. We have tested the program on Windows 8.1 Pro and come across several bugs. It crashed several times while trying to create widgets and became unresponsive upon configuring some settings. Bottom line All in all, Xpeon-Zen provides a simple way for helping you create multiple widgets for monitoring various system-related tasks. Tips and short descriptions about the program's capabilities are shown in the GUI but they are not translated accurately into English so it may prove to be difficult to understand how the tool works. Wallpapers App is one of the best and easy tools to change your desktop wallpapers. It has more than 15,500 wallpapers from 90 countries and the user can download wallpapers according

to theme, location, and multiple sets. It has excellent and latest features that are totally new and interesting. You can also change the colors and text on the wallpapers. You can download your wallpapers in a zip file and can easily open it on your

Xpeon-Zen Full Version

Xpeon-Zen is a small utility to help you manage and have a fresh look to your desktop and at the same time be able to quickly access your most often used applications. It provides a quick access widget on your screen (left side) which allow you to quickly launch applications, organize your desktop, launch your desktop menu, open a note, launch your web browser, launch a calculator and so on. It features a calendar widget to let you easily organize all your appointments, a clipboard manager to automatically assign and copy all your items, a couple of widgets to easily launch your file system, system tools, and even a label for your desktop. It also includes a couple of widgets for any advanced user, like for example an RSS reader and a rainmeter for your desktop. All the other activities are organized into

a central application, so there will never be any confusion on how to use it.

Xpeon-Zen Key features:

- * Create a list of applications, launchers, shortcuts and files for quick access to any program that comes to mind.
- * Create notes, assign hotkeys, and organize your desktop.
- * Give a unique look to your desktop with widgets and themes to personalize your desktop.
- * Keep track of your most important information: your thoughts, ideas, and reminders.
- * Take full advantage of your screen by creating one or several real widgets for a short glimpse of your desktop.
- * Choose the style of your desktop dashboard from different categories of widgets and click on the widget of your choice.
- * Automatically set a personalizable color to your widgets to make it easier to find and use them.
- * Check the battery level, CPU usage, memory usage, active processes and files.
- * Very easy to use, works at a

glance. * Supports Windows XP, Vista, 7, 8, and 8.1. * Support for desktop themes and desktop dashboard customizations. * Support for translated user interface. * Support for Internet Explorer 8. Xpeon-Zen Frequently Asked Questions * Can I create a tabbed bar instead of a sidebar? The first version of Xpeon-Zen implemented a sidebar to easily access your frequently used applications. This is a very convenient way to quickly launch applications, but if you wish to create a tabbed bar, just click on the "Create a tabbed bar" button in the settings. The sidebar will then be transformed into a tabbed bar. * Can I create

What's New in the?

"Xpeon-Zen is a desktop enhancement utility for Windows 8.x which allows you to create and manage widgets for the desktop. Have your reminder on the left or the right side. Have a battery widget

on your left or right side. Xpeon-Zen has several widgets for monitoring your system, such as memory usage, battery level, battery life remaining, and much more. You can monitor the details of these widgets and you can quickly find out whether your computer is performing well or whether you need to do something about it. Xpeon-Zen is an easy-to-use and perfectly designed desktop utility." Purpose Xpeon-Zen is a lightweight desktop enhancement utility whose purpose is to help you place a sidebar on your screen that lets you access various utilities, such as note keeper, battery watcher, calculator and search tool. User interface The sidebar resembles the Charms bar adopted by Windows 8. A smart button integrated in the GUI allows you to hide it from your view.
