Mac Mini portable? 13 Oct 2017 18:21 The Portable
Audio Code: How to Lose Money and Get Lost at the
Same Time Is there a way to do a post download
checking script on an iOS device (iPhone) so that all
audio is saved as a 192Khz PCM not MP3? I'd like to
be able to play a video file on a portable media device
(blu-ray or portable dvd player) and then send the file
to my car audio system (fritz a1892) to rip and
transcode it to the 16 bit 96khz PCM that my song will
be played back at on my 1997 auto head unit. The
output from the Fritz unit is 23khz 16 bit 96khz PCM.
I've tried doing this through a number of different
apps I found on the App Store but the output is always
PCM. I have the Fritz a1892 with the 4th audio output
port on it. G e79caf774b
