"Computer Tycoon" is like a mix between Game Center (a game where you can meet new friends and have fun while you play), Snow Bros, and Angry Birds. The main objective of the game is to build a "company" as you go through game "Actions", where you come up with different computer application concepts, but are always equipped with certain ideas and skills (you can share all of this with friends). To do this, you must build up your own company, buy new equipment, upgrade it, and hire employees and workers. Things get complicated when you have to manage multiple companies and/or you need to play against other players, and you can earn more money by using different methods. You can buy new equipment (like a computer) with gold or money, but only if you fulfill certain conditions such as needed a specific type of equipment (ex. a controller). But I dont want to ruin the pleasure for you to find this yourself, so I have included screenshots from the various companies you build, and the types of games you can create. In this game, you can focus on the concepts and creations while not worrying about how to balance the various levels, prices, and things like that. The graphics are pretty good, and I quite like the use of emotions and emojis as well! The characters are adorable! I would give the game a 8/10. Computer Tycoon Gameplay Video: Computer Tycoon Gameplay Video: A game in which you can connect to Facebook to share information, build a company, hire employees, sell products, and share economic information with friends through computer networks. The characters design is wonderful! Ambiguous, since the game is still under development, but overall a cheerful game. The game is addictive and very entertaining. It is easy to play for both adults and children. You just need some basic computer skills to succeed in the game. It provides a set of easy but very fun game options, and helpful upgrades and concepts in the game. This game is good, not a masterpiece, but I recommend it! It can be played on your phone, tablet, or on Facebook. You can also send feedback and comments regarding the game. It is very easy to play, but it is very difficult to succeed with computers. For mobile devices, it takes more time to play. It is a little addicting. I recommend the game to everyone! Reviews - Game Reviews - Ambiguous GamingHere's what happened. After a long time without making any games, I decided
