The Project can be opened and viewed at any time - including by people who do not have the full version of the software. The Project may be shared and distributed. The included files are for the nonexclusive, personal use only. Also, you can take the software directly to its limits and extract the most from the full version of ARCHLine.XP and all of its features. ARCHLine.XP allows you to download a trial version for 30-days which gives you the opportunity to evaluate the software. You can then purchase a permanent license (or just sign up for a subscription). With a permanent license, you're not tied to any particular version of ARCHLine.XP, and you have the ability to buy upgrades or patches to the software as they are released. In its entirety, the LT license is completely optional, allowing the user to have as many projects open as needed without the limitations and high price of a subcription. As part of the LT license, the last version supported of ARCHLine.XP is ARCHLine.XP LT 2021. Hence, the perpetual license includes all of the updates and fixes up until July 2020 and is completely bug-free. This means you pay once, and own the software forever. The perpetual license is highly advantageous since you don't need to pay for expensive subscriptions each year that can break your bottom line by thousands of dollars. These subscription strategies are generally used by larger software vendors to continually increase their profit even if it negatively impacts their clients' bottom line. Technically, subscriptions force you to keep paying if you want to still be able to open/edit your project(s). In a more advantageous scenario, you pay once for an ARCHLine.XP LT perpetual license and you have the chance to decide how to manage your software license, where you can:
