Making selections is a little clunky, so I like the other big feature that's new to Photoshop: Make Selection. This tool lets you easily paint around and cut out a section of an image, put it into a stack or action, and save it. When Adobe first announced Lightroom 5, I expected some major enhancements to an already efficient photo-management tool, but I was surprised when, in an interview with the *New York Times*, Lightroom team members officially revealed that the company beefed up the editing interface and included a brand new feature called "Scene Optimizer." The latter is an AI-powered tool that helps create the most flattering image possible of you; further, it helps Lightroom users identify and catch unexpected wrinkles and flaws in your image. The team had also improved the editing interface, adding smarts to it so that it more easily detected, removed, and corrected those flaws. **You can also find controls for adjustments in the same place in both programs.** We would suggest creating a second workspace in Photoshop Elements for adjusting images in the traditional way. We haven't yet had to do that, as the tools are hidden under the respective menus. The incredible power of Photoshop brushes will appeal to artists, site owners, designers, web developers, and just about anyone who wants to quickly bring some pattern or color to a photo, illustration, or even live video stream. Brush tools are also useful for lighting or photo retouching.

Brooke Tyler started her career as a freelance video and online producer, but soon realized how ineffective the traditional editing workflow was. Knowing she needed a better workflow for her own efficiency first-hand, she created and refined the Kelly Key workflow. This workflow is able to give any photographer a handle on post production, and a true attention to detail the likes of which they had never seen. Today, Brooke travels the world giving presentations at teleseminars and conferences about her workflows, has produced six instructional DVD videos about her workflow, and hosts Photoshop Uprising series at Visionary Home .
