Schizophrenia is characterized by an inability to experience life as meaningful. By giving a kind of "color, mood and texture" to the events in her life, conscious awareness is transformed into the ability to identify with an experience that is not considered about and choose how to react to it. In the following article, I want to show you how to improve your Hearthstone performance with OBS and MadVR. OBS and MadVR open a new world for video recording: a world of possibilities. Streamers use many different apps to record videos: XSplit, XSplit2, OBS, OBSEE, OBS Studio, Twitch... MadVR is a completely different program. It is an open source program where you can record your gameplay using an external application. Together, these two programs allow you to record your Hearthstone gameplay using YouTube or Twitch on a computer to record gameplay and adding audio in a second step. You can also use this system to improve your Hearthstone performance. You can modify your own video and fine-tune it by yourself. You can find and download MadVR here. Here is an example on how to use MadVR to
